Presented by Eric D. Blom, Ph.D.

The information in this chart has been compiled by Dr. Blom based upon his extensive clinical experience. Refer to product instruction manual for complete information.

Voice Prostheses	STYLES			STYLES	
	 DUAL VALVE™ Indwelling Voice Prosthesis Available in 20 Fr.	 ADVANTAGE® Indwelling Voice Prosthesis Available in 16 & 20 Fr.	 CLASSIC™ Indwelling Voice Prosthesis Available in 16 & 20 Fr.	 LOW PRESSURE Voice Prosthesis Available in 16 & 20 Fr.	 DUCKBILL Voice Prosthesis Available in 16 Fr.
FEATURES	CLINICIAN-PLACED			PATIENT-CHANGEABLE	
Employs atraumatic Blom-Singer Gel Cap Insertion System.					
Small diameter prosthesis (16 Fr.) for use in questionably healthy TE wall tissue.					
Anti-fungal additive (silver oxide) incorporated in valve as a material preservative.					
Valve (20 Fr.) offers minimal resistance to speech airflow.					
Voice prosthesis is available in one millimeter (mm) incremental lengths.					
Optional increased valve resistance to prevent air ingestion to stomach.					
Optional large esophageal flange to prevent leakage around prosthesis.					
Optional large esophageal and tracheal flanges provide a "double seal" for enlarged puncture tracts and "tear-drop" or irregular shaped punctures.					
Optional Increased Valve Resistance with Large Esophageal Flange					
TEP Occluder: Voice Prosthesis with its valve permanently sealed closed.

Table of Contents

In 1978, Drs. Singer and Blom pioneered the methods of tracheoesophageal puncture and valved silicone voice prostheses that for over the past 30 years have become the international standard for voice restoration, allowing thousands of patients worldwide to regain their ability to speak. As a leading supplier of advanced voice restoration systems, our goal at InHealth is to help laryngectomees regain and preserve a vital part of their lives – their voice.

Blom-Singer® Voice Restoration System

VOICE PRODUCTION

By creating a small surgical puncture just inside the stoma, from the back wall of the trachea into the esophageal wall, a voice prosthesis can be placed into this passage to enable tracheoesophageal speech. Voice is produced by temporarily blocking the stoma so that exhaled air from the lungs can be directed from the trachea through the prosthesis into the esophagus and then out through the mouth. Fluent, conversational speech may be acquired within just a few days.

Blom-Singer Classic

Blom-Singer Advantage

Blom-Singer Dual Valve

Clinician-placed (indwelling) voice prostheses are for laryngectomees who are unable or reluctant to perform the routine removal and insertion necessary for the cleaning and maintenance of patient-changeable voice prostheses.

Rapid Response special order voice prostheses are offered with a wide range of features and sizes for patients who have special needs.

Advantage and Dual Valve voice prostheses are for patients who are susceptible to Candida growth. Both valves are imbedded with silver oxide, an antimicrobial agent that has been proven to eliminate or reduce the need for antifungal agents such as Nystatin™ or Mycelex®.

–**Color Coding** has been applied to products throughout this catalog to assist the user in identifying the compatible accessories for the largest selection of styles and sizes of voice prostheses available.

Blom-Singer® Voice Prosthesis—Clinician-placed

Blom-Singer® Advantage® Indwelling Voice Prosthesis

Introduced in 2003, the Advantage indwelling voice prosthesis is the first prosthesis ever to incorporate a valve imbedded with silver oxide as a material preservative**. This feature may eliminate or reduce the need for anti-fungal agents such as Nystatin for some users, but not for others.

Blom-Singer® Classic™ Indwelling Voice Prosthesis

Since its introduction in 1994 as the first indwelling style voice prosthesis, the Classic indwelling voice prosthesis has been a premier voice restoration product for laryngectomees worldwide. It is designed with increased esophageal and tracheal flanges for maximum retention and incorporates a radiopaque ring for visualization under x-ray.

Blom-Singer® Rapid Response Voice Prosthesis

Special Order Voice Prosthesis Program

People are different, and a standard voice prosthesis may not be right for everyone. That's why we've introduced the new **Rapid Response Special Order Voice Prosthesis Program**. Now you can order from a wide range of specially designed products.

Now Available!

Special Length:

Available in one millimeter incremental lengths for comfort and a more precise TE puncture fit.

Large Esophageal Flange:

Provides a "seal" to help manage leakage around a voice prosthesis. Also, enables a safe and convenient downsizing from a wider diameter prosthesis to a smaller diameter.

Effectiveness is dependent on an optimal prosthesis length fit that achieves a snug flange-to-flange seal against the wall surface(s).

Large Esophageal & Tracheal Flanges:

Provides a "double seal" in patients with significantly enlarged puncture tracts and "tear-drop" or irregularly shaped punctures.

Effectiveness is dependent on an optimal prosthesis length fit that achieves a snug flange-to-flange seal against the wall surface(s).

Increased Resistance:

A voice prosthesis with a valve that opens less easily. Designed to be used in patients in whom conventional voice prostheses open intermittently with fluctuations in esophageal pressures resulting in air ingestion and/or leakage.

TEP Occluder:

Voice Prosthesis with its valve permanently sealed closed.

Handsfree Speech

In 1982, Drs. Blom, Singer and Hamaker introduced the first tracheostoma valve for hands-free speech. Today, the Blom-Singer Adjustable Tracheostoma Valve (ATSV II), is a vital component in tracheoesophageal voice restoration following total laryngectomy. Commonly referred to as our 'Hands-free valve' it eliminates the need to cover the stoma with a thumb or finger to produce voice. An optional Blom-Singer HumidiFilter® Cap may be worn with the Hands-free valve to help reduce mucus secretions, coughing and dryness.

Blom-Singer Adjustable Tracheostoma Valve II (ATSV II) Starter Kit with HumidiFilter Cap

The Starter Kit includes one complete ATSV II; six Blom-Singer TruSeal Contour adhesive housings; one HumidiFilter Cap and seven HumidiFilter foam filters; two standard tracheostoma valve housings; one standard size tape/foam disc sampler pack; one 2 oz. bottle of silicone adhesive with brush cap, Skin Prep and Remove.

REF	DESCRIPTION	Rx
 BE8024H*	ATSV II Starter Kit w/HumidiFilter Cap	•

*For patent reasons, the housings in this kit can not be used in Germany together with the InHealth HME product, item # BE1055.

Blom-Singer Adjustable Tracheostoma Valve II

The Adjustable Tracheostoma Valve II (ATSV II) consists of two pieces, a Diaphragm/Faceplate and Body. The assembled two-piece valve inserts into the tracheostoma adhesive housing that is applied to the skin surrounding the stoma. The Diaphragm/Faceplate is available separately.

Heat & Moisture Exchange—HME

The HME system helps users improve their quality of life by serving as a partial replacement for lost nasal functions. It does so by filtering and exchanging cool, dry air for warm and moist air. It's critical for laryngectomees to breathe in air that contains the proper heat and moisture content to protect the trachea and lower airway from drying and cooling. Daily, consecutive use of the Blom-Singer HME System contributes to a healthier respiratory tract, restores airflow resistance, and helps to maintain optimal lung ventilation.

OPEN

The *EasyTouch*™ speech button gives immediate tactile response. You'll feel the difference.

CLOSED

*Healthier breathing,
less mucous and coughing.*

The HME System is placed over the tracheostoma for inhaled and exhaled air to pass through. However, it does not obstruct the user's ability to breathe or talk.

Blom-Singer HME Cartridge

The HME cartridge is a lightweight, daily disposable device that inserts into all styles of the TruSeal® Adhesive Housings. The Blom-Singer HME system may be used by all laryngectomees: esophageal speakers, electrolarynx users, and tracheoesophageal prosthesis users with manual occlusion.

REF	DESCRIPTION

Laryngectomy Tubes & Buttons

The Blom-Singer Laryngectomy Tube is a durable, lightweight silicone tube that is used to keep the tracheostoma open after laryngectomy. It is available in a variety of sizes/styles and flexibly contours to the postoperative tracheal anatomy. For use with a voice prosthesis, the recessed area may be modified (fenestrated) by a trained clinician for use with a Blom-Singer voice prosthesis. However, for convenience a pre-fenestrated series is available that eliminates the need for manual fenestration. Blom-Singer Laryngectomy Tubes are available in three product offerings described below.

Speech Aids

Electrolarynx speech consists of a speaking aid device that, when held against the neck or cheek, produces sound vibrations that are conducted through the acoustics of the throat and mouth. This sound is articulated by the tongue, lips and teeth into speech.

Servox® Digital Electrolarynx

The SERVOX Digital has been designed to help the laryngectomee quickly regain the ability to speak as easily and clearly as possible. With the SERVOX Digital, a clearer sound is made possible by a “digital” processor instead of an “analog” processor. Two completely independent tones are separately programmable for different volume intensities and frequency settings. There are no distracting clicking sounds of tone buttons when they are depressed. The SERVOX Digital Speech Aid complete set includes one SERVOX Digital speech aid, safety lanyard, holster, 110V charger, oral connector with two tubes, soft-tone screw cap, CD-ROM instructional software, instruction manual, and two NiMH batteries. The Software Communication Set is sold separately.

REF	DESCRIPTION
17140	SERVOX Digital Speech Aid, (2 NiMH batteries included)

ChatterVox™ with Headset Microphone

The ChatterVox portable voice amplification system is designed to elevate vocal output to achieve a louder speech level that is comfortable and effective for everyday communication. It can boost vocal output for esophageal speakers and users of tracheoesophageal voice prostheses. ChatterVox features a Nickel-Metal Hydride (NiMH) rechargeable power system that can provide up to 14 hours of continuous use. Comes with a headset microphone and amplifier, which is normally worn at the front of the waist. Set includes: one ChatterVox voice amplifier, one ChatterVox headset microphone, one power adapter, one amplifier cover, and six rechargeable NiMH batteries.

REF	DESCRIPTION

Blom-Singer® Voice Prosthesis Accessories

Blom-Singer Flushing Device and Cleaning Brush

These accessories are an integral part of daily maintenance. The Flushing device allows a voice prosthesis to remain in the tracheoesophageal passage while routine cleaning is performed. It is filled with water, which is then carefully injected through the voice prosthesis, to flush out accumulated debris. The cleaning brush has important safety features to prevent it from being inserted too far into the prosthesis or trachea.

REF	DESCRIPTION	Rx
IN4050	Flushing Device, 3 ea	
IN4064	Cleaning Brush, 3 ea* 16/20 Fr. Small, 4mm–8mm	•

Blom-Singer® Tracheostoma Attachments

To ensure the successful use of the Blom-Singer HME System or ATSV II, a full line of products are available for your convenience.

Attachment of an HME cartridge or ATSV II to the tracheostoma is achieved through the use of a TruSeal adhesive housing or tracheostoma valve housing.

HME cartridge

ATSV II with HumidiFilter Cap

Standard

Blom-Singer TruSeal® Adhesive Housing

The TruSeal Adhesive Housing is a lightweight, disposable, all-inclusive adhesive tape-disc/housing that eliminates the need for a tracheostoma valve housing, tape, or adhesive foam disc. It is designed to hold the ATSV II, HME cartridge or Shower Guard over the stoma.

REF	DESCRIPTION
BE6053*	TruSeal Adhesive Housing, Standard, 7 ea
BE6054*	TruSeal Adhesive Housing, Standard, 30 ea
BE6565*	TruSeal Adhesive Housing, Standard, 500 ea

Oval

Blom-Singer TruSeal® Contour Adhesive Housing

The new TruSeal Contour Adhesive Housing is a lightweight, malleable material that comfortably fits various peristomal anatomies. It is offered in three shapes and will stand up to the rigorous demands of everyday use. The TruSeal Contour is a disposable, all-inclusive adhesive tape-disc/housing that eliminates the need for a tracheostoma valve housing, tape, or adhesive foam disc. It is designed to hold the ATSV II, HME cartridge or Shower Guard over the stoma.

REF	DESCRIPTION

Skin Care

Adhesive Barriers *Ideal for protecting the skin around the stoma from adhesives.*

Shield Skin®

Provides a clear, protective, plasticized barrier between skin and external devices for better tape and adhesion. Water-resistant and non-staining.

REF	DESCRIPTION
44005	Shield Skin, box of 50

Skin-Prep™

Effective topical barrier between skin and external devices for better tape adhesion. Non-irritating.

REF	DESCRIPTION
4204-00	Skin-Prep, box of 50

Cavilon™ No Sting Barrier Film

Convenient pad protects skin from fluids, adhesives, and friction. No sting formula dries quickly to form a breathable, transparent coating.

REF	DESCRIPTION
3344	Cavilon No Sting Barrier Film, box of 25

Adhesive Removers *Ideal for removing adhesive from around the stoma when changing the attachments for the HME, ATSV II, HumidiFilter Holder, or Shower Guard.*

Remove™

Solvent formulated to dissolve adhesives and assist in removing residues from the skin. Convenient, easy-to-carry, single-use wipes.

REF	DESCRIPTION
4031-00	Remove™ Adhesive Remover Wipes, 50 ea

TacAway™

A convenient, easy to use, one-step adhesive remover. Unique formula effectively removes adhesive residue, leaving the skin clean and dry. No greasy film.

REF	DESCRIPTION
MS408W	TacAway™ Adhesive Remover Wipes, 50 ea

Alcohol Prep Pads

Removes oils from skin, ideal for preparation of stoma area for the attachment of the HME, ATSV II, Showerguard, and HumidiFilter. Also ideal for removing Skin-Tac Adhesive Wipe.

REF	DESCRIPTION
C29600	Alcohol Prep Pads, box of 100

Sanitizers *Ideal for maintaining a clean contact for the device and protects against bacteria.*

Norisc® Germicidal Towelettes

Conveniently maintains clean contact from hand to device. Rinseless formula offers same benefits as antimicrobial soap. Perfect for travelling or when standard hand-washing facilities are not available. Enriched with Aloe Vera.

REF	DESCRIPTION
10903	Norisc Germicidal Towelettes, bag of 30

Ca-Rezz® Cream

Formulated with Triclosan and Nonoxynol-9, ensures a long lasting antimicrobial barrier, protecting against bacteria, yeasts and fungi. Vitamins A, D, & E create a gentle, healing formula that leaves the skin feeling healthy and soft. Allantoin and lanolin protect and soothe while offering quick relief to sore, sensitive areas.

Introducing... The New Blom-Singer® Scar Management Gel Sheet

- Self-adhering
- Reusable
- Washable

Now Available in Two Shapes:

CIRCLE

BE6080 2.75" OD x 1" ID Circle to reduce scarring around the stoma Package of 1

RECTANGLE

BE6081 1.5" x 5" Rectangle shaped to reduce large straight scarring Package of 2

For best results, the Blom-Singer® Scar Management Gel Sheet should be applied as soon after healing as possible. However, it may be used on older scars. Regardless of the scar's age, patients should begin to see the scar soften, flatten and fade within 7 to 90 days.

Research

The following are excerpts or summaries from various professional journal articles regarding the use and effectiveness of silicone-based products like our Blom-Singer® Scar Management Products for fading scars:

Results from at least eight randomized controlled trials and a meta-study of 27 trials demonstrate that silicone gel sheeting is a safe and effective management option for hypertrophic scars and keloids.

International Clinical Recommendations on Scar Management, T. Mustoe, R. Cooter, M. Gold, R. Hobbs, A. Ramelet, P. Shakespeare, M. Stella, L. Teot, F. Wood, U. Ziegler. Plastic and Reconstructive Surgery Vol 110, No. 2 August 2002:560-571

"Silicone gel sheeting is safe and effective treatment for hypertrophic and keloid scars". All subjects applied the gel sheeting in the same fashion and wore it for twelve to twenty-

four hours per day for at least two months. After at least six months' follow-up, 56% of the chronic scars were improved. Eleven of fourteen fresh or recent hypertrophic scars (79%) did not recur after surgery during a similar follow-up period.

Therapeutics for the Clinician, Silicone Gel Sheeting in Scar Therapy, Katz B.E., Cutis 1995; 56:65-67

"We concluded that topical silicone gel is efficacious, both in prevention and in the treatment of hypertrophic scars" We studied the effects of a silicone gel bandage that was worn for at least 12 hours daily on the resolution of hypertrophic burn scar. Clinical assessment corroborated this quantitative demonstration of a decrement in scar volume.

Topical Silicone Gel for the Prevention and Treatment of Hypertrophic Scar S.T Ahn, W.H. Monafu, T.A. Mustoe, Arch Surg-Vol.126 April 1991: 499-504

Stoma Protection & Accessories

Guards and Shower Collars *Designed to protect the tracheostoma during showering. Not intended for swimming. One size, available in several styles.*

Blom-Singer Shower Guard

The Blom-Singer Shower Guard is a one-piece, right-angle plastic shower guard that comes with a Tracheostoma Standard Adhesive Housing and 30 double-sided Adhesive Tape Discs. Can also be attached to the stoma using the TruSeal Adhesive Housing.

REF	DESCRIPTION	Rx
 BE6048	Shower Guard, 1 ea	•

Rubber Shower Collar

Mouth & Stoma Moisturizers

Mouth-Kote®

Relieves dry mouth and throat for two to five hours. Derived from the Yerba Santa plant which mimics saliva, has a pleasant citrus taste, sugar-free, alcohol-free, low in sodium, and safe to swallow.

REF	DESCRIPTION
098-02	Mouth-Kote Oral Moisturizer, 2 oz. bottle
098-08	Mouth-Kote Oral Moisturizer, 8 oz. bottle

Unit Dose Saline Solution, 15ml, .9% Sodium Chloride

Aids in secretion removal and hydration of the tracheostoma. Chemical and preservative free.

REF	DESCRIPTION
SA0924	Unit Dose Saline Solution, 15ml, box of 24

Simply Saline™ Sterile Mist and Moisturizer

Moisturizes and clears congestion, does not burn, sting or harm delicate tissues. Naturally pure and preservative free, contains a sterile solution of 0.9% sodium chloride and purified water.

REF	DESCRIPTION
B2915	Simply Saline, Moisturizer, 1.5 fl. oz.
B2916	Simply Saline, Sinus & Allergy, 1.5 fl. oz.

Vicks® Personal Steam Inhaler

Comfortable hood adapts to the stoma area to allow cool air to enter and mix with the steam to loosen mucus and phlegm from respiratory tract. Includes steam inhalant pad with eucalyptus. Dual voltage and compact size make it ideal for travel.

REF	DESCRIPTION
V1200	Vicks Personal Steam Inhaler

Vicks® Inhalant Pads

Each pad gradually releases soothing aromatic vapors when used with the Vicks Inhaler.

REF	DESCRIPTION
KMP-6	Vicks Inhalant Pads, box of 6

Personal Needs & Stoma Illumination

Laryngectomy Needs Kit

The kit comes in a discreet black travel bag containing a small, two-way mirror (one face magnifying), a light (requires 2 AA batteries), 5" (12.7cm) straight forceps for daily cleaning, saline solution vials for irrigating the stoma, Norisc™ antimicrobial wipes, alcohol prep pads, and a white cloth stoma cover. Also comes with the patient demonstration video by Richard Crum, InHealth consultant and experienced laryngectomee. The stylish travel bag allows ample room for other personal supplies and allows many personal stoma care items to be kept always on hand.

REF	DESCRIPTION
PK1000	Laryngectomy Needs Kit

Personal Alarm with Flashlight

In emergency situations this convenient device provides three important functions: an alarm siren, a flashing light, and a flashlight. The 105 decibel siren activates by pulling the rip-cord while the flashing light to attract attention begins at the touch of a button. The statement - "My larynx has been operated on and I am unable to speak. I need HELP immediately." - is clearly printed on the device for responding personnel. Pocket size ideal for travel or when away from home.

REF	DESCRIPTION
BE7800	Personal Alarm with Flashlight (9v battery included)

Laryngectomy Lighted Mirror

This chrome lighted 5x magnification mirror from Conair is ideal for daily stoma care. The mirror has various settings for light intensity, and provides illumination that resembles evening, home, office, and daylight. The magnification ensures that the reflection of the stoma area is large and clear. The neck of the mirror angles easily to suit individual patient preference.

REF	DESCRIPTION
BE18LCX	Laryngectomy Lighted Mirror

Maglite® Solitaire

Less than an ounce and only three inches in length, this surprisingly bright light is a perfect travel companion for on-the-go stoma care. Comes with one AAA battery.

REF	DESCRIPTION
K3A012	Maglite Solitaire

Zelco® Flexlight

This flashlight has a unique long reaching flexible neck to provide bright light where needed and is small enough to fit in the palm of your hand. The clip-on feature allows it to be used hands free. Extra bulb included, requires two AAA batteries.

REF	DESCRIPTION
90003	Zelco Flexlight

Professional Products

Blom-Singer Tracheoesophageal Puncture Set*

Designed for secondary placement of a tracheoesophageal puncture. Includes a disposable 16 gauge curved introducer needle with a 14 gauge Teflon® sheath, a 26" (66cm) silicone catheter with a tapered reinforced tip attached to a 24" (61cm) Teflon-coated stainless steel leader cable, and a fenestrated surgical drape with adhesive around the aperture.

REF	DESCRIPTION
BE6055	Tracheoesophageal Puncture Set, Sterile

Blom-Singer Dilator-Sizer*

Why utilize two separate instruments to dilate and measure the tracheoesophageal puncture tract? The new Blom-Singer Dilator-Sizer combines two crucial tasks into one innovative product. Now, in one step the clinician can dilate and measure the tracheoesophageal passage during voice prosthesis placement procedures.

REF	DESCRIPTION
BE2051	18 Fr. Dilator-Sizer (for 16 Fr. prostheses), 1 ea
BE2052	22 Fr. Dilator-Sizer (for 20 Fr. prostheses), 1 ea

Blom-Singer Voice Prosthesis Sizer*

The Blom-Singer Voice Prosthesis Sizer is a measurement device used by physicians and qualified speech pathologists to select the appropriate Blom-Singer voice prosthesis length. The device measures the length of tracheoesophageal puncture between the trachea and the esophagus. Markers on the device correspond to the length of the prosthesis. The tracheoesophageal puncture tract should always be measured before inserting a voice prosthesis to confirm tract length. The sizer is available in either 16 Fr. or 20 Fr. diameter. Three inserters included; replacement inserters available separately.

REF	DESCRIPTION
BE6036	Voice Prosthesis Sizer, 16 Fr., with 3 inserters, 1 kit
BE2036	Voice Prosthesis Sizer, 20 Fr., with 3 inserters, 1 kit
BE6096	Replacement Inserters For use with both 16 Fr. and 20 Fr. sizers, 10 each

Manometer with Manometer Adaptor*

A training aid for clinicians to teach patients how to self-regulate intratracheal air pressure. Proper airflow control results in better voice quality, less fatigue, and longer duration of the tracheostoma adhesive housing seal.

REF	DESCRIPTION
BE8000	Manometer Kit includes one manometer, one manometer adaptor and one TruSeal adhesive housing
BE8020	Replacement Manometer Adaptor includes 5 manometer adaptors and 5 TruSeal adhesive housings

* Restricted to sale or use by a licensed, medical professional.

Professional Products *(continued)*

Blom-Singer Insufflation Test Set*

Aids the physician or speech pathologist in administering the esophageal insufflation test to determine the ability of a laryngectomized patient to produce tracheoesophageal voice. Disposable system consists of a 50cm long, silicone (latex-free), 14 French catheter imprinted with a 25cm length marker attached to an insertable tracheostoma adapter. The tip of the catheter is radiopaque for convenient fluoroscopic viewing. A tracheostoma housing and double-sided adhesive discs are provided for attaching the tracheostoma adapter.

REF	DESCRIPTION
BE6040	Insufflation Test Set, box of 6

Scissors*

Assists clinician in removal of the silicone neck strap on a Blom-Singer Indwelling Voice Prosthesis.

REF	DESCRIPTION
BE6062	7½" (19cm) curved, angled, flat, serrated

Hemostat*

Assists clinician in the withdrawal of an indwelling-style voice prosthesis in routine maintenance.

REF	DESCRIPTION
BE6061	5" (12.7cm) straight locking

Clinician Headlight

Used for examining the tracheostoma, the compact, lightweight design and comfortable fit make this cordless headlight well-suited for otolaryngologists, speech pathologists, and other medical staff. Designed with portability and economy in mind. Two AA batteries are included. Replacement Bulbs and Replacement Headband are available separately.

Oto-Rhino Foreign Body Remover*

The Katz Extractor Oto-Rhino Foreign Body Remover is a small, lightweight, single-use device for quick and easy extraction of foreign bodies from the nose or external ear canal. It comes in a convenient, ready-to-use five-pack box. There are no expensive supplies (such as Fogarty's, Foleys, syringes, forceps, etc.) to hunt and assemble, and no additional suction equipment is required.

- Ready-to-use
- Atraumatic
- Quick Extraction
- Economical

Katz Extractor Oto-Rhino Foreign Body Remover

Removal of foreign bodies has never been easier. It takes three simple steps to complete an extraction. During trial studies, most extractions took, on average, less than 2 minutes to complete.

REF	DESCRIPTION
FB 5000	Katz Extractor Oto-Rhino Foreign Body Remover, box of 5

Freeman® Frontal Sinus Stent* with Blom-Singer® Gel Cap Insertion System

The Freeman Frontal Sinus Stent is designed to provide post-operative drainage of the frontal sinus and to prevent blockage of the frontal outflow tract following sinus surgery. The stent is intended for placement with an insertion instrument under endoscopic or direct visualization. Incorporating the Blom-Singer gel cap insertion system, the stent can be inserted with the use of a gel cap. This silicone stent includes angled flanges to provide retention. Provided as a sterile kit and includes: one stent, one insertion instrument, one Blom-Singer gel cap loading tool, and three gel caps.

REF	DESCRIPTION
BE 1400-R2	14 Fr, diameter, 20mm length
BE 1600-R2	16 Fr, diameter, 20mm length

Freeman Frontal Sinus Stent DVD

Narrated by Stephen B. Freeman, M.D., F.A.C.S. This 16 minute video includes discussion of the objectives of the stent, indications for use, insertion procedures, including endoscopic procedure and external approach, as well as removal of the stent. (Mac and PC compatible)

Ordering Information

International Customers

InHealth products are available through authorized distributors worldwide. For international distributor information, please contact our customer service department.

USA Customers

Our caring and knowledgeable customer service representatives are available to assist you, Monday through Thursday, 9:30 am to 7:00 pm, and on Friday, 9:30 am to 5:00 pm, Eastern Standard Time. Our toll-free number may be used from the continental USA, Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

Ordering Information

We at InHealth Technologies strive to provide the method of ordering that is most convenient for you. Please choose from the following:

Telephone	Toll-Free (800) 477-5969 or (805) 684-9337
Fax	Toll-Free (888) 371-1530 or (805) 684-8594
E-Mail	order@inhealth.com
Order Online	www.inhealth.com
Mail	InHealth Technologies 1110 Mark Avenue, Carpinteria, CA 93013-2918 USA

Shipping and Handling within the United States

Standard shipping is a 3-business day service. Overnight service is available upon request at an additional charge. Due to Air Safety Standards, orders containing Simply Saline will be shipped via Ground (5 to 7 business days). Please contact customer service for details.

Payment

Check, Money Order, VISA, MasterCard, Discover, American Express, and C.O.D. are accepted.

Prescription Devices

Products with Rx next to their name are prescription items. Please note that a prescription from a qualified medical professional must be on file with InHealth Technologies for these products (individual Rx items must be specifically listed on the prescription). Caution: USA Federal law restricts these devices to sale by or on the order of a qualified medical professional.

HIPAA Readiness Statement

InHealth Technologies values your trust and the relationships we share – so we take great care to inform you of our efforts to conform to all applicable HIPAA regulations covering "Privacy Standards." As a business charged with the responsibility of receiving, processing, distributing and storing "private health information" (PHI), our business procedures and computer systems have been modified to incorporate compliance requirements. In some cases, InHealth may disclose health information only for the purposes of facilitating payment of patient invoices for our clients. Prior to disclosing such information InHealth must first receive a signed HIPAA Consent Agreement from the patient. These agreements will assure all parties that individual healthcare information privacy rights are maintained to safeguard patient information.

Medicare

A Medicare information form is available upon request. Please contact our customer service department for a copy of the form. If a patient is a Medicare beneficiary, we will need a completed Medicare information form and a copy of the beneficiary's Medicare insurance card. This form need only be submitted one time, unless information such as address or eligibility status has changed. Once current information is on file, Medicare claims will be submitted on a routine monthly basis. All orders must be prepaid — we do not accept Medicare assignment. Medicare reimbursement will come directly to the patient.

Insurance Reimbursement

Two copies of your purchase receipt will be mailed to you after each shipment/purchase. These receipts may be included in the claim to a private insurance carrier.

Consumer Affairs

If you have any questions or dissatisfaction with a product, please contact our customer service department at (800) 477-5969 or you may email us at consumeraffairs@inhealth.com

Returned Goods Policy

All returned merchandise must have a Return Merchandise Authorization number (RMA), and must be unopened and undamaged. Returns without an RMA will not be accepted. Products must be returned in unopened packages, with manufacturer's tamper evident seals intact to be accepted for replacement or credit. Products will not be accepted for replacement or credit if they have been in the possession of the customer for more than 14 days. Special order products are not returnable. There is a 20% restocking fee on all returned merchandise. To obtain an RMA number, please contact us at (800) 477-5969 or email us at productreturns@inhealth.com

Additional Order Forms

If you would like an additional order form or would like one sent to a colleague or friend, please call customer service at (800) 477-5969 or email your request at info@inhealth.com

LIMITED WARRANTY

InHealth Technologies, a division of Helix Medical, LLC (Seller) warrants that the Product will perform substantially in accordance with the accompanying instructions and will be free from defects in materials and workmanship under normal use for a period of fourteen (14) days from date of receipt. Seller's entire liability and your exclusive remedy shall be, at Seller's option, either (a) return of the price paid, or (b) repair or replacement of the Product that does not meet Seller's Limited Warranty and that is returned with a copy of the receipt. No returns will be made without authorization from Seller by calling 1-800-477-5969. This Warranty may be void if the Product is damaged by improper storage, accident, misapplication, or if it is modified or subject to misuse or abuse.

TO THE EXTENT PERMITTED BY LAW, THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, ARISING BY LAW OR CUSTOM, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SAID IMPLIED WARRANTIES BEING HEREBY EXPRESSLY DISCLAIMED.

To the extent permitted by law, in no event shall Seller be liable for any direct, indirect, special, incidental, consequential, punitive or exemplary damages of any kind, even if Seller has been advised of the possibility of such damages. These limited warranty terms give you specific legal rights, and some states/jurisdictions do not allow limitations on the duration of an implied warranty or the exclusion or limitation of liability for certain damages, therefore the above limitations, in whole or in part, may not apply to you.

Introducing the New Blom-Singer® Dual Valve Voice Prosthesis

Our new dual valve indwelling voice prosthesis uses leading-edge design to deliver on a very simple, but powerful benefit: two valves are better than one!

Should the primary valve fail due to Candida (yeast) colonization, the secondary valve is intended to remain viable to help prevent leakage of fluids.

As an added advantage, each valve is imbedded with silver oxide, an antimicrobial agent that provides significant protection to the device for laryngectomees who are susceptible to Candida growth. Blom-Singer voice prostheses that contain silver oxide have been proven to eliminate or reduce the need for antifungal agents, such as Nystatin™ or Mycelex®.

Included with the Dual Valve Voice Prosthesis is a unique pop-through insertion system, designed to assist the clinician in the deployment of the esophageal flange during placement.

The Dual Valve voice prostheses are offered in non-sterile 20 Fr. indwelling packages, in five lengths:

LENGTH	20 FR DIAMETER
6mm	DV2006-NS
8mm	DV2008-NS
10mm	DV2010-NS
12mm	DV2012-NS
14mm	DV2014-NS
